

WHY CHOOSE A **MOUNTAIN TRAX** BUILD KIT BIKE PACKAGE?

We have selected the best equipment for each pricepoint that we know performs well and is fully compatible with many different frame types.

Competitive package prices that represent a generous discount in the Build Kit.

You still get the option to customise your bike with our build kits so it becomes your dream machine, you're not tied in to the "bike in a box" specification.

For example; choose custom hub or rim colours, select bar rise, specify the stem length, upgrade to a higher quality fork, fit a triple or double chainset, or even add a tubeless tyre system.
(some upgrades maybe chargeable).

Your new bike will have been fully assembled in our workshop by qualified mechanics with great attention to detail.

Every new bike includes a free 6 week health check.

IT'S AS EASY AS 1, 2, 3....

(29" WHEELS)

Complete Bike Price highlighted in blue includes; frame, build kit, 100mm Rockshox fork. A fork upgrade with alternative travel maybe required.

Notes:

- Hope Hoops EVO Pro2 wheelsets can be supplied with custom coloured hubs free of charge.
- The build kits are flexible to a degree; for example you can select the XT groupset in black or silver, specify the bar rise and stem length, all at no extra cost. Other modifications such as increasing the disc rotor size or adding a tubeless kit will incur an upcharge.
- Pedals are not included, please specify model required.....
- Build kits can only be purchased with frames and forks, as a complete bike package.
- Mountain Trax reserves the right to provide alternative components where parts maybe unavailable.

3. SELECT A FORK UPGRADE (upgrade prices)

The complete bike prices include a Rockshox Recon Gold TK 100mm Air Fork. To fully optimise your desired frame, a fork with alternative travel (lesser or greater) maybe required, along with additional features such as a tapered steerer, bolt through axle etc. Please select an upgrade from below and add or subtract the price to Page 1.
